

# Leonidas Williams

## Front-End Developer

Front-End Developer with a proven ability to collaborate effectively with senior developers while spending extra time to be mentored. Enjoy working closely with team members to ensure workloads are effectively redirected to bottlenecks and personally picking up the slack when necessary. With a passion for both personal growth and for software development, I attended a 1000+ hour coding bootcamp to learn new languages while sharpening existing skills. Ready to apply my passion for coding to a talented engineering team to develop quality solutions.

### WORK EXPERIENCE

#### HelloFresh

Junior Front-End Developer

Remote | June 2021 - current

- Set up testing framework for team project using Mocha and Chai to test the Node API. This **decreased the amount of bugs pre-deployment by over 70%**.
- Worked in an agile environment with weekly stand-ups, kept track of user stories/bugs in GitHub projects, and conducted 2 hours of sprint planning and sprint retrospectives per week. This process allowed production to increase by 45% while decreasing overall time invested by 20%.
- Participated in pair programmed with 3 engineers, and reviewed team's code to provide additional perspective and catch previously missed errors.
- Tested React components using Jest.

#### Blend

Front-End Developer Apprenticeship

Remote | January 2021 - June 2021

- Assisted in building beautiful user interfaces for clients without compromising functionality for aesthetics.
- Implemented newly-learned front-end object-oriented programming to develop client server systems.
- Wrote unit tests in Jest. This **made products 100% bug free**.
- Learned and applied Agile methodologies and principles.

### PROJECTS

#### Sickle To 'Em

Designer, Developer

2021 - current

- Built a full-stack web app to allow **Sickle Cell Anemia patients to keep track of 15+ medications needed for treatment**.
- Used React to allow users to instantaneously update the medication list interface without reloading.
